Evidence principle: reproduce the demonstrated product logic and visual hierarchy; do not treat the screenshots as a substitute for the implementation requirements in the build prompt.

01 — Multilingual interface

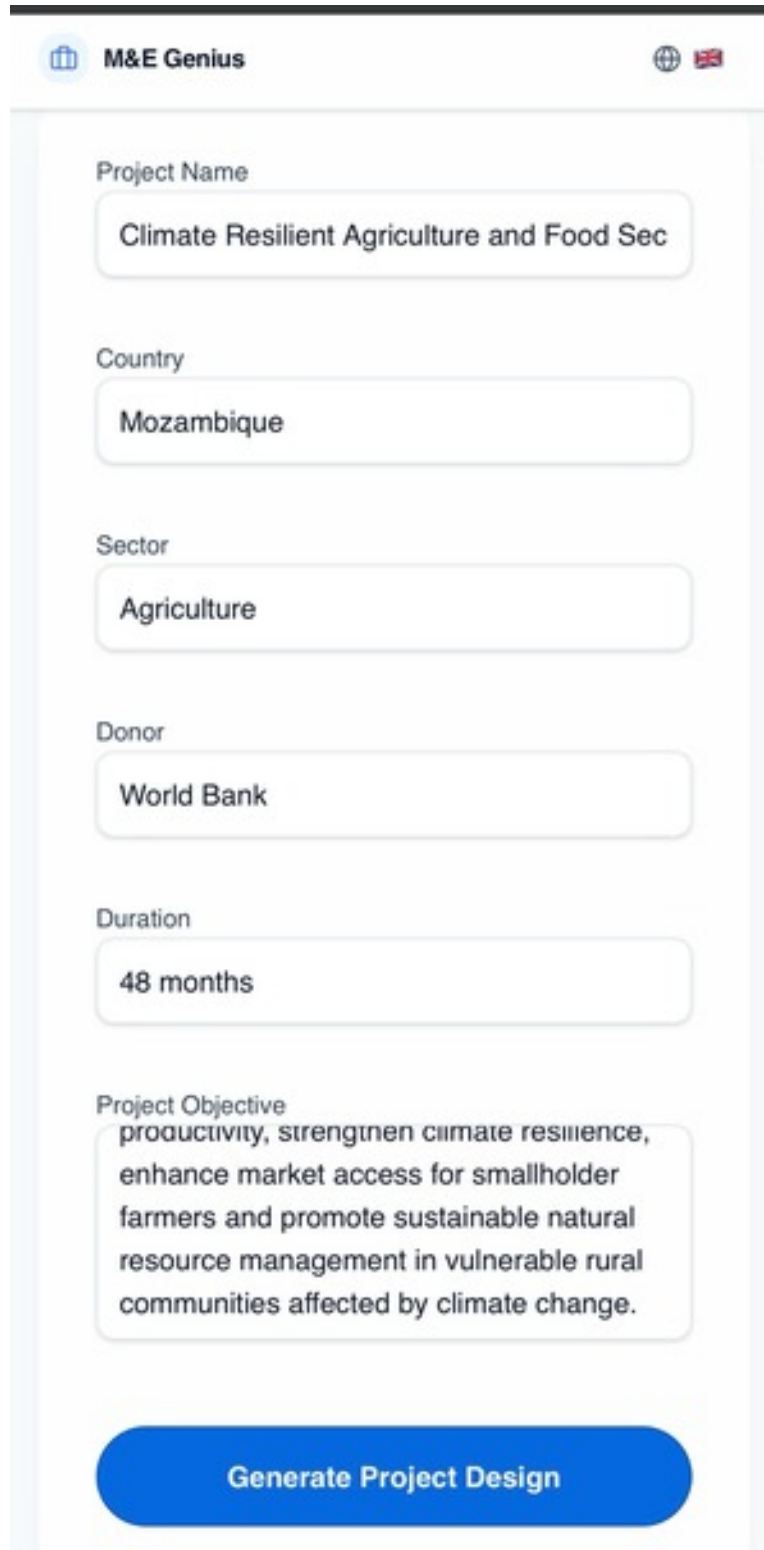

The interface demonstrates seven language options: English, Português, Français, Español, Italiano, 中文 and العربية, including RTL support for Arabic.

The language selector visibly includes seven languages, with Arabic presented as RTL.

02 — Project Design input workflow

The workflow captures project name, country, sector, donor, duration and project objective before generating a project design.

The screenshot displays the 'M&E Genius' application interface. At the top, there is a header bar with the 'M&E Genius' logo on the left and a globe icon with a red flag on the right. Below the header, the form is organized into a vertical sequence of input fields, each with a label and a text box. The fields are: 'Project Name' with the value 'Climate Resilient Agriculture and Food Sec'; 'Country' with the value 'Mozambique'; 'Sector' with the value 'Agriculture'; 'Donor' with the value 'World Bank'; 'Duration' with the value '48 months'; and 'Project Objective' with a multi-line text description: 'productivity, strengthen climate resilience, enhance market access for smallholder farmers and promote sustainable natural resource management in vulnerable rural communities affected by climate change.' At the bottom of the form is a large, rounded blue button with the text 'Generate Project Design' in white.

M&E Genius

Project Name
Climate Resilient Agriculture and Food Sec

Country
Mozambique

Sector
Agriculture

Donor
World Bank

Duration
48 months

Project Objective
productivity, strengthen climate resilience,
enhance market access for smallholder
farmers and promote sustainable natural
resource management in vulnerable rural
communities affected by climate change.

Generate Project Design

03 — Generated Results-Based Management Framework

The generated output presents a Results-Based Management framework, including an overall goal and project-level results logic.

 M&E Genius

GENERATED RESULTS-BASED MANAGEMENT
FRAMEWORK

Climate Resilient Agriculture and Food Security Programme

 **Generated Results-Based Management
Framework**

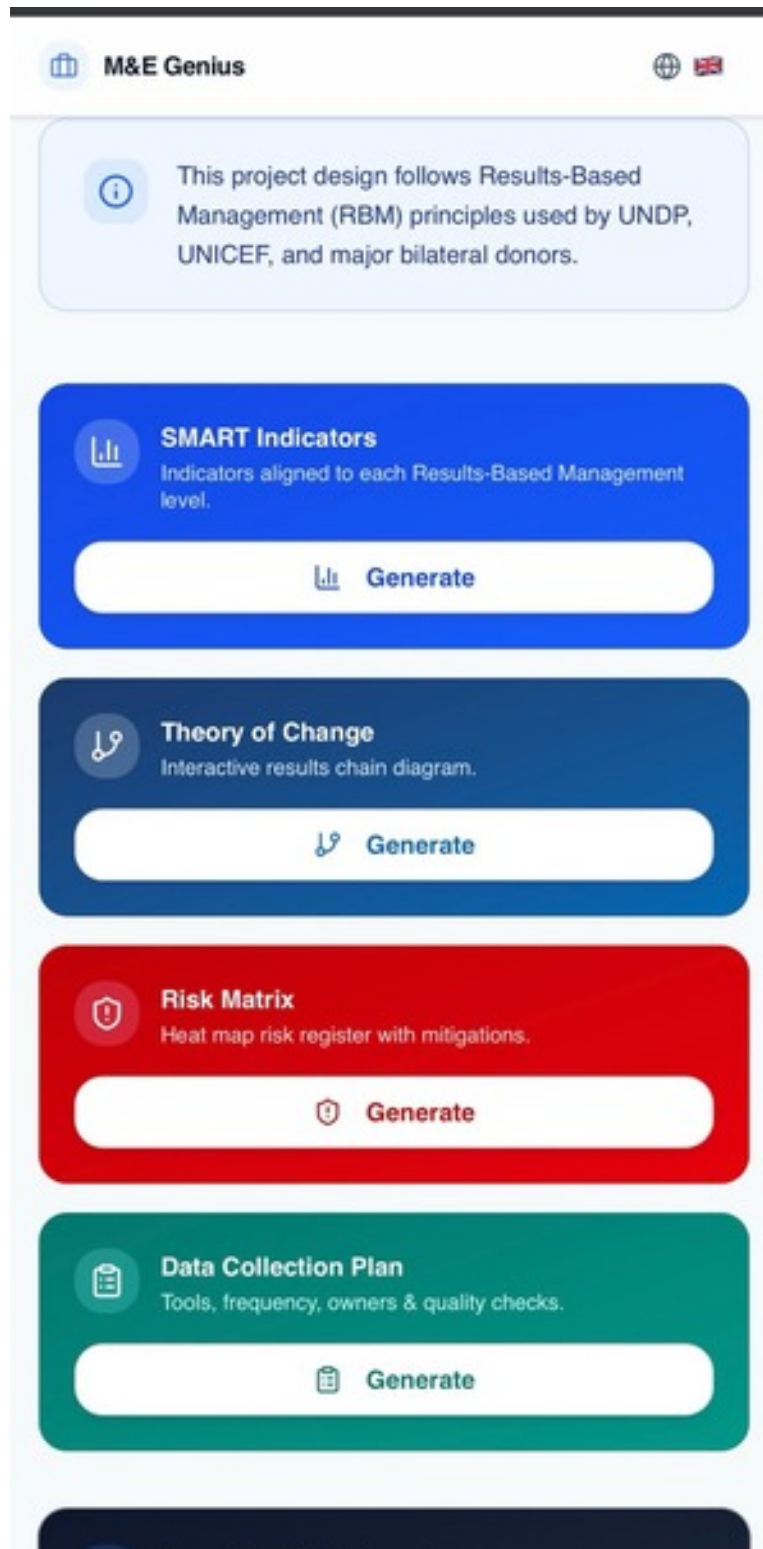

Overall Goal

This project design follows Results-Based Management (RBM) principles used by UNDP, UNICEF, and major bilateral donors.

To contribute to sustainable improvements in sustainable agricultural productivity and food security in Mozambique, aligned with national Agriculture priorities and funded by World Bank, so that smallholder farmers and rural households experience measurable and lasting improvements in wellbeing.

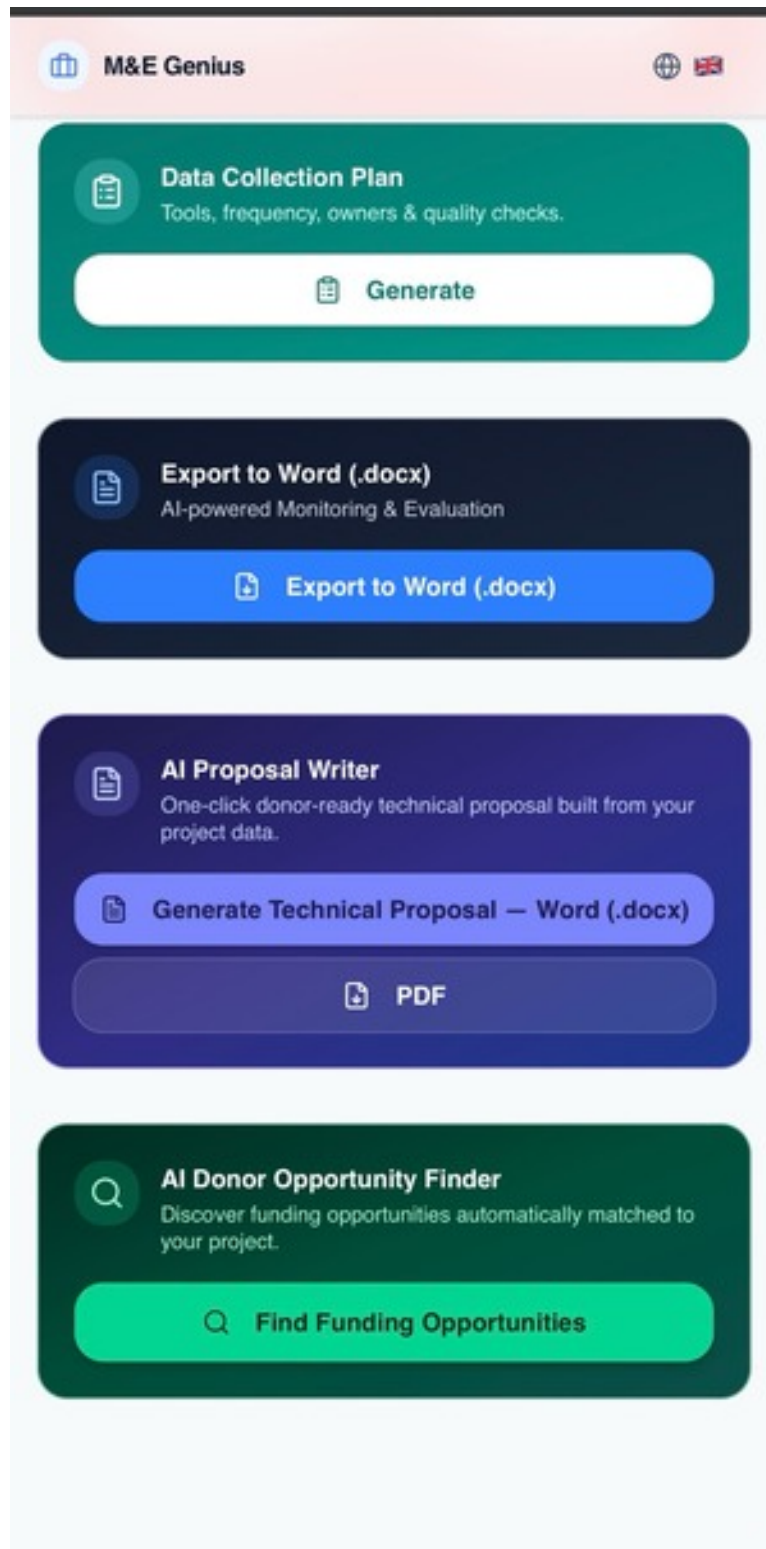

04 — Core M&E; generation modules

Dedicated modules are provided for SMART Indicators, Theory of Change, Risk Matrix and Data Collection Plan.

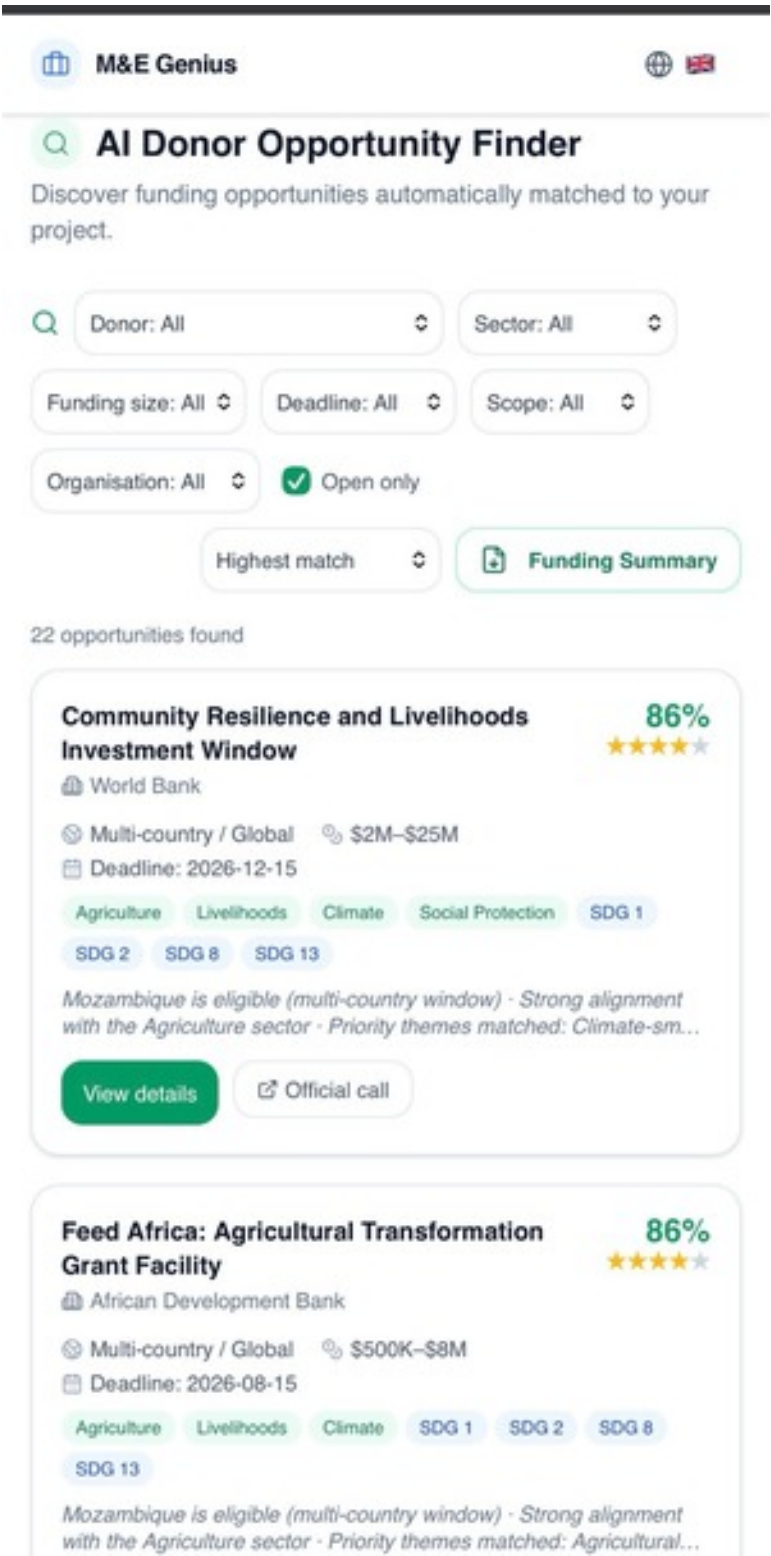

05 — Export, Proposal Writer and Funding Discovery

The product provides Word export, an AI Proposal Writer with Word/PDF outputs, and an AI Donor Opportunity Finder.

06 — AI Donor Opportunity Finder

The funding interface supports filtering and match scoring, with funding-summary and official-call functionality.

Funding discovery is presented as a structured workflow rather than a generic chat interface.
